

DATE: 13 Nov 1974

TO: Ed  
FROM: Gene  
SUBJECT: SAFE Hearing

REMARKS:

1. The OMB hearing on SAFE is scheduled for tomorrow, 14 November, at 0930 in the DDI Conference Room. The Plan is as follows:

a. You will open the hearing with a 5-10 minute statement on the objectives of SAFE, the need for it, etc.

b. [ ] will talk for about 45 minutes about the experiments he conducted, the modules, and generalized findings on the modules.

c. Analysts will be available for questions. (Harry will provide questions to Paul.)

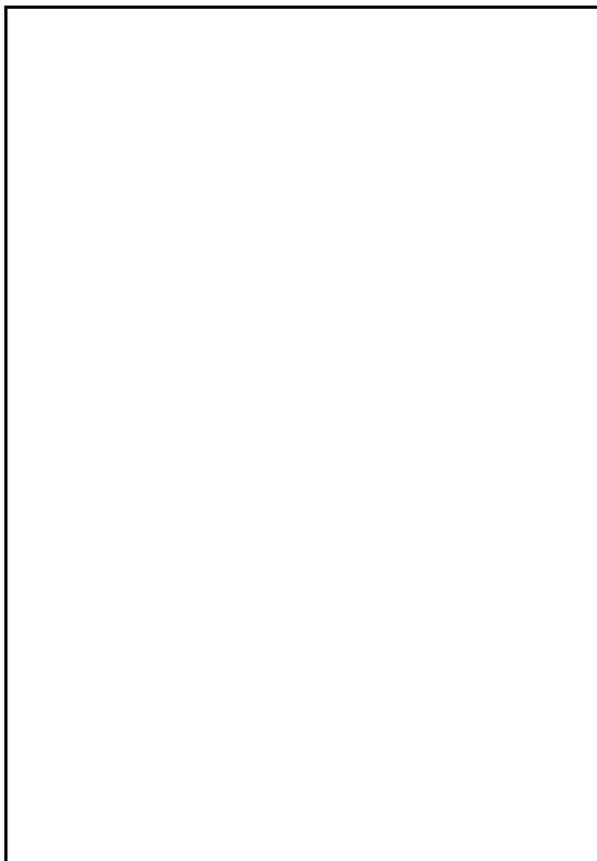

d. [ ] will then talk on preliminary design evaluation (the five companies).

e. Eisenbeiss will wind up the briefing portion with where we are, what we do next, and costs.

2. Those present will be:

OMB  
Jim Oliver

3. The main points I think you should address: Why is SAFE necessary?

--Accumulation of info (volume)

STAT

- Need to ensure that all data relevant to an analytical problem is accessible by the analyst and is considered in his analysis.
- Means better access to:
  - own files
  - central store of info
- Fewer analysts--must amplify his ability to access his info with whatever tools available.
- Make easier for analysts to do job and to respond more quickly to with all information.
